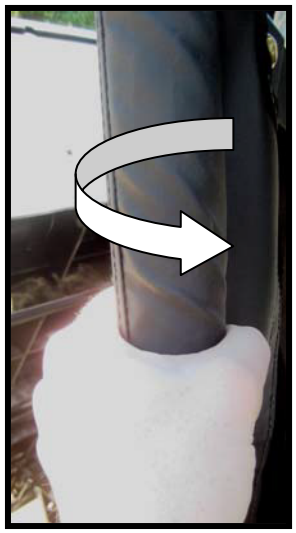
SEIZMIK
ADVANCED UTILITY SYSTEMS

Part# 04016

Installation & Operations Manual
Mid Size Polaris Ranger UTV Dust Panel
Part #04016 54-SW-90522

1. Lay the Dust Panel over the roll cage of the vehicle making sure the straps are on the outside of the roll cage. Secure the top straps first. If some straps interfere with the hardtop mounting configuration, omit the attachment of those straps.

Tip = Lift the dump bed to make installation easier.



2. Locate the straps (wide and thin) running down the length of the rear vertical ROPS bar. Fasten around the bar. Repeat this step for the opposite side.

Tip = A good way to get the straps tight is to rotate the top around the bar like in the picture on the right.

3. Adjust the straps for tight fit.

Congratulations – You have now finished the installation of your Dust Panel.

How to get Help - If you have any questions, comments, need assistance, or are missing parts, please call 1-866-838-3366 between 9:00AM and 5:00PM EST. You can email us at support@seizmik.com, visit www.seizmik.com to download installation guides and product info, or contact your powersports dealer where you purchased your Seizmik product if you need additional assistance.
