Installation Information:

This product does not require any modifications to your vehicle. Please familiarize yourself with all the steps before beginning assembly.

Compatibility Info:

This windshield is designed to work with other Seizmik branded Accessories for the Polaris General as well as OEM Polaris branded hard tops. Please note Seizmik cannot guarantee fitment with other branded aftermarket products. Please research installation details on our products and others when trying to combine different branded accessories.

Seizmik makes Windshields, Mirrors, Door Kits, Light Bars, Hood Racks, and other great accessories for UTV's to maximize the vehicles usefulness. To help you do what you do better.

If you have any questions, comments, need assistance, or are missing parts, please call 1-866-838-3366 between 9:00AM and 5:00PM EST. Or email us at service@seizmik.com. Visit www.seizmik.com for more information on our products.

Installation:

1. Peel plastic 4" back on all sides of windshield. Remove completely after windshield is fully installed.

2. Push the gasket on the windshield starting from the middle of the bottom edge. The bulb should be on the inside of the windshield, the side of the windshield with the vent levers.

3. Your windshield should look like this when you are finished installing the gasket.

4. Open the clamp and place around roll cage with the SZ logo facing forward as shown.

5. Place four clamps in the approximate locations shown.

6. Place the windshield on the vehicle and slide the clamps up and down to line up with the holes on the sides of the windshield.

7. Line up holes in the backing plate with holes in the windshield and insert. The peg on the backing plate should go in the inside holes (not the holes near the edge of the windshield).

8. Attach the windshield to clamp with bolt and knob as shown above. Tighten knob to secure windshield.

VENT OPERATION:

Turn handle to adjust vent. If the vent seems too tight or too loose, it can be adjusted by turning the T10 Torx screw in the handle.

The vent has 3 positions: Closed, Defog, and open.

SEIZMIK
